DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE TITLE:

Delete "Method and" and change "device" to --Device-- .

2. The following is an examiner's statement of reasons for allowance:

The Examiner agrees with Applicant's arguments. The closest prior art suggests a device comprising a hyperbaric pressure chamber having an inlet and outlet, first and second wheel sluices, and at least one nozzle capable of spraying water vapor.

However, said prior art neither teaches nor suggests such a device, structured for conditioning tobacco material, having at least one nozzle located within said chamber arranged, as argued by Applicant, to prevent catching tobacco edges which could result in the accumulation of tobacco, and a heating jacket which, as Applicant asserts, is structured to allow water vapor of a higher temperature than the vapor temperature of the nozzle to run therethrough and prevent water vapor from condensing on the inside wall of the chamber.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
